

BROW PERMANENT MAKEUP HEALING STAGES

DAY 1

You have beautiful, new brows. Redness or tenderness may occur.

DAYS 2-5

Eyebrows will be itchy and appear darker and thicker. Natural exfoliation will begin.

DAYS 5-10

Your brows may begin slightly flaking as the skin goes through the healing process. (Powder brows will flake more).

DAYS 10-15

Your brows may appear thinner and lighter while the skin heals.

DAYS 15-30

Your brows will begin filling back in, but may look patchy.

WEEKS 4-8

The brows inner skin healing reaches final stages. Color and strokes continue to soften. Time for your touch-up!

BROW PERMANENT MAKEUP AFTERCARE TIPS

Do not pick or scratch the treatment area.

Twice a day, clean with antibacterial soap and pat dry.

Apply a thin layer of Hustle Butter (HB) Permanent Makeup aftercare balm.

Do not use skincare products with active ingredients for two weeks.

Avoid pools, working out and excessive sweating, and direct water contact.

Do not undergo facials, BOTOX, lasers or peels for at least four weeks.

Avoid direct sunlight/tanning for at least four weeks. After brows are fully healed, always use sunblock on your fresh brows.

Sleep on your back and use a clean pillow case.

Do not pluck or remove any hair until your brows are fully healed.

Take Ibuprofen as needed to help with pain and swelling.
