

AFTER AGNES:

- You may take anti-inflammatory medication and antibiotics for three days, if necessary.
- Slight swelling may occur on treated areas immediately after the treatment but will be alleviated within one week.
- Bruising and or redness may last for a week.
- Re-epithelialization may occur for 3-7 days post treatment.

POST TREATMENT INSTRUCTIONS FOR SCULPTED AREAS (EYEBAGS, JOWLS, NECK):

- Apply ice pack 3-5 times per day, 3-5 minutes per treated side for the next 3 days.
- Remove hydrocolloid dressing the day after treatment.
- Keep the area clean and dry.
- Avoid direct sunlight and apply sunblock once healed (1 week).
- Avoid alcoholic drinks for at least one week after the treatment.
- Avoid aerobic exercise today and tomorrow.

POST TREATMENT INSTRUCTIONS FOR SPOT TREATED AREAS:

- Apply Aquaphor healing ointment or Vaseline 2-3 times a day until lesions have healed (2-7 days depending on size and number of lesions treated).
- Keep the area clean and dry.
- Avoid direct sunlight and apply sunblock once healed (1 week).
- Avoid alcoholic drinks for at least one week after the treatment.

CONTACT THE OFFICE IF THE TREATED AREAS HAVE:

- Prolonged itchiness, edema (swelling), erythema (redness), bruising, or pain
- Painful swallowing (if neck area treated)
