

WHAT ARE EYELASH EXTENSIONS?

Lash extensions are synthetic fibers that are individually attached to the natural lashes using a professional, medical-grade adhesive. Proper placement allows lash extensions to make the eyes appear wider, more open, and lifted.

WHAT IS THE DIFFERENCE BETWEEN CLASSIC LASHES VS VOLUME LASHES?

The "Classic" Lash technique applies one single synthetic lash to each natural lash.

Classic Lashes are suitable for the following clients:

- Clients that have a good amount of healthy, natural lashes that would like to add length.
- Clients that only have a few gaps in their lashes.
- Clients who would prefer a more natural look.

The "Volume" Lash technique applies 2-3 lashes to one natural lash. These lashes are thin, lighter, and fluffier lash giving you a fuller look by adding more volume and texture.

Volume Lashes are suitable for the following clients:

- Clients that have a good amount of healthy, natural lashes that would like to add fullness/thickness.
- Clients who would prefer a more dramatic look.

HOW DO I PREPARE FOR THE SERVICE?

Thoroughly clean your lashes with a mild cleanser. Use an oil-free makeup remover to remove any eye makeup and clean your lashes before the application. If you regularly wear false lashes or waterproof mascara, spend extra time cleaning your lashes before your service. Try to avoid caffeinated beverages or medications that may cause you to feel jittery, thus causing your eyelid to flutter or pulse during the application.

WHAT DOES THE APPLICATION PROCESS ENTAIL?

A new, full set of lashes takes about 2 hours (120 minutes), so please be prepared for that (mentally, physically, your schedule, etc).

HOW LONG DO LASH EXTENSIONS LAST?

Eyelash extensions are semi-permanent and we only use professional-grade adhesives specifically designed for lash extension application. The adhesive, while strong, is not super/hair/nail glue, and therefore lash extension shedding

LASH EXTENSIONS

Full Set Classic (60 min): \$250

Touch-up* Classic (30 min): \$100

Full Set Volume (90 min): \$350

Touch-up* Volume (45 min): \$150

* Touch-up = within 2-3 weeks of last visit or >50% gone

can and will occur. Additionally, your natural lashes go through a growth cycle (much like the hairs on your head) and will therefore shed.

While your eyelash extensions can last up to 6 weeks, they will become noticeably less full during that time. Therefore, we recommend touch-ups, or a "Lash Fill", every 2-3 weeks (depending on your retention) to keep the lash set looking full and fabulous.

WHAT DOES A LASH FILL APPOINTMENT CONSIST OF?

Fill Appointment should be scheduled every 2-3 weeks to maintain the health and integrity of your natural lashes, as well as to ensure that your lash extensions have not grown out more than 2mm from your lash base. Waiting too long (when the lash extensions have grown out past 2mm) can lead to lashes becoming "top-heavy". This can result in eye irritation, possible long-term damage to the hair follicle, and even breakage of your natural lashes. During a lash fill, we remove any outgrown lash extensions, replace them with new ones, and add fresh lashes to your new natural lash growth.

HOW DO YOU REMOVE LASH EXTENSIONS?

Please do not attempt to remove your lash extensions by yourself, as you may damage your natural lashes. Come in and have them professionally removed with a specially formulated gel or cream remover. Or, let the eyelash extensions slowly fall out by themselves.
